### Taking responsibility - utilising opportunities - ensuring future viability

The topic of sustainability, with its wide range of environmental, social and corporate aspects, has become increasingly important and dynamic since the European Union's Green Deal. Companies and also the public sector are facing a variety of challenges in the transformation towards sustainable, ESG-compliant performance.

Our law firm offers comprehensive advice for clients in the area of ESG (Environmental, Social and Governance). We will be happy to show you how ESG issues can be utilised as an opportunity and how sustainability strategies can be implemented in a legally compliant manner. A detailed overview of our services in the areas of *environmental, social, governance, sustainable finance and sustainability claims* is now available on our newly published ESG website.

As a companion to the business community in Germany, our experienced ESG team offers customised and well-founded solutions to support you in meeting legal and regulatory requirements. We put our advice entirely at your service - personal, pragmatic, professional. Please get in touch with us!
